## About Me

I'm a passionate junior web developer focused on creating fast, responsive, and visually appealing websites. I enjoy working with modern tools like **React**, **Next.js**, and **Tailwind CSS**. Currently, I'm building real-world projects to improve my skills and contribute to the tech community.

My journey as a developer started with self-learning and diving deep into online tutorials and courses. I thrive on challenging problems, constantly pushing myself to learn and apply new concepts. Through my work, I aim to make the web a more accessible and beautiful place for users.

Besides programming, I have a passion for graphic design, where I create graphic projects that allow me to develop my creativity and aesthetic perspective in web projects. I believe that good design can enhance the user experience and turn a functional website into a memorable one.

---

## Skills

- **Languages:** HTML5, CSS3 (Flexbox, Grid), JavaScript (ES6+)
- **Frameworks / Libraries:** React.js, Next.js
- **Styling:** Tailwind CSS, CSS preprocessors (Sass)
